Objective:

Aspiring Data Scientist with expertise in Python, SQL, Data Analysis, and Machine Learning. Eager to leverage data-driven insights to support business decision-making and innovation...

Technical Skills:

- Programming Language : Python, SQL
- Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Data Cleaning, Data Wrangling, Exploratory
- Machine Learning: Scikit-learn, Classification, Regression, Model Evaluation, Feature Engineering
- Statistical Analysis: Descriptive Statistics, Probability, Hypothesis Testing, Correlation Analysis
- Databases: MySQL, MongoDB
- Tools & Platforms: Jupyter Notebook, Google Colab, VS Code, Git, GitHub
- Python Concepts: OOP, Data Structures & Algorithms (DSA), File Handling, Modules & Packages

Behavioural Skills:

- Team Leadership
- Adaptability
- Communication Skills
- Analytical Thinking
- Quick Learner
- Disciplined and Punctual

Educational Qualification:

- Bachelor of Technology (B.Tech) – Computer Science & Engineering (2022 – 2026) Narasaraopeta Engineering College, Narasaraopet Percentage: 87.5%
- Intermediate (Class XII) – MPC (2020 – 2022) Government Junior College For Girls Percentage: 87%
- Secondary School Certificate (SSC) (2019 – 2020) S.G.N.K.M.C.G.High School Percentage: 94%

Intrenships:

AI-Driven Data Analytics Internship

- Performed data cleaning, preprocessing, exploratory data analysis (EDA), and visualization on structured datasets..
- Applied machine learning techniques to identify patterns and generate actionable insights.

AI / ML Virtual Internship

- Implemented supervised machine learning models for classification and prediction tasks.
- Conducted model training, testing, and performance evaluation using Scikit-learn..

Projects:

AI-Powered Personalized Tutoring System

- Built a deep learning-based system to detect diabetic retinopathy from retinal images for early diagnosis support...
 - Applied data processing and analytical techniques to evaluate learning progress and improve user engagement..
- ### Diabetic Retinopathy Detection System (Deep Learning)

- Built a deep learning-based system to detect diabetic retinopathy from retinal images for early diagnosis support.
- Worked on image preprocessing, model training, and performance evaluation to derive meaningful insights from medical data..

Certifications:

Data Science and Analytics – IBM

Data Analysis – Microsoft & LinkedIn

Data Science & Analytics – HP Life

Languages Known:

- English,Hindi,Telugu
