Objective:

Motivated Computer Science student with strong skills in Python, SQL, and object-oriented programming. Seeking a Python Developer role to build scalable applications and enhance problem-solving skills in a collaborative environment.

Technical Skills:

- Programming Language : Python
- Databases : SQL, MySQL, MongoDB
- Python Development: OOPs, DSA, File Handling, Modules & Packages
- Analytical Skills : Data Cleaning, Data Interpretation, Trend Analysis
- Version Control : Git, GitHub, VS Code
- Libraries: Pandas, NumPy, Matplotlib, Scikit-learn

Behavioural Skills:

- Team Leadership
- Adaptability
- Communication Skills
- Analytical Thinking
- Quick Learner
- Disciplined and Punctual

Educational Qualification:

- Bachelor of Technology (B.Tech) – Computer Science & Engineering (2022 – 2026) Narasaraopeta Engineering College, Narasaraopet Percentage: 81.5%
- Intermediate (Class XII) – MPC (2020 – 2022) Government Junior College For Girls Percentage: 87%
- Secondary School Certificate (SSC) (2019 – 2020) S.G.N.K.M.C.G. High School Percentage: 94%

Internship:

AI-Driven Data Analytics Internship

- Performed data cleaning, exploratory data analysis, and applied basic machine learning techniques to extract insights from structured datasets.
- Gained hands-on experience in data interpretation and supporting data-driven decision-making using Python.

AI / ML Virtual Internship

- Implemented basic machine learning algorithms and understood the end-to-end ML workflow including data preparation and model evaluation.
- Explored real-world AI/ML use cases and strengthened analytical and problem-solving skills

Projects:

AI-Powered Personalized Tutoring System

- Developed an AI-powered web application that enables students to interact with uploaded content through chat, quizzes, and personalized progress analysis.
- Gained hands-on experience in data handling, AI integration, and building real-world analytics-driven solutions for education.

Diabetic Retinopathy Detection System (Deep Learning)

- Built a deep learning-based system to detect diabetic retinopathy from retinal images for early diagnosis support.
- Worked on image preprocessing, model training, and performance evaluation to derive meaningful insights from medical data.

Certifications:

Data Science and Analytics – IBM
Data Analysis – Microsoft & LinkedIn
Data Science & Analytics – HP Life

Languages Known:

- English, Hindi, Telugu
